24 June 2021

Dear Andrea

### **Dimmer Liaison meeting – Friday 25 June 2021**

Unfortunately I am unable to attend the Liaison meeting on Friday afternoon and I understand that several other people are also unable to be there. We thought it would be useful to send the questions below in advance of the meeting so that they can be discussed.

#### **Viridor news**

Which are the Dimmer “businesses” affected by the Biffa sale?

#### **Transfer Station report**

Please can we have more detail on the WTS fire? We have heard from reliable sources that there were problems with:

- access to the tank valves by the Fire Service
- storage volumes and that there's to be an EA investigation relating to this
- inadequacies of the fire suppression protocol leading to pollution release
- a door malfunction and its rectification

Now that the waste is being transferred via another facility at Evercreech, which is far more suitable in terms of access, is there really a need for the WTS at Dimmer?

#### **Environmental and Regulatory Matters**

Did the 23<sup>rd</sup> April inspection find that compliance was met? If not, why?

What is the outcome of the Regulation 61 Notice?

Why are the willow beds not being used? What is being done?

What has been amended in the Leachate Plan?

What failings were included in the EA compliance assessment report of 11<sup>th</sup> June?

I would be grateful if the questions could be raised at the meeting.

Kind regards

Sally Snook
